

AviComp Controls GmbH is a medium-sized engineering company from Leipzig with further locations in Europe and Asia. Thanks to the experience gained from more than 1,500 completed projects in various industries and due to extensive certifications, the company is one of the leading providers for control and automation technology as well as in the field of digitization.

To strengthen our team and to address our diverse tasks we are seeking you as

Automation Engineer (m/f/d)

The tasks include in particular:

- engineering of measurement and control technology (instrumentation, controls, valves, controls, security systems, surveillance systems, etc.) based on extensive customer specifications
- extensive programming of PLCs
- documentation preparation for job-related software
- implementation of commissioning
- failure analysis of the cabinets in the company's own test center and on site

Our requirements:

- Bachelor's degree in electrical engineering or equivalent education, preferably in the fields of process engineering, automation, mechanical engineering
- software knowledge in PCS7, Step7 WinCC
- good analytical and structured way of working
- team spirit, diplomatic skills and self-confidence

We offer:

- an interesting area of responsibility
- an international team and strong team spirit
- wide range of training courses and a very good induction plan
- flexible working hours and home office
- height-adjustable work station
- JobTicket with a subsidy of EUR 50.00 per month or a fuel card
- company pension scheme with an AG share of 120% or 127,00 EUR
- JobRad
- corporate sports and corporate events

Interested in joining our team? We are looking forward to receiving your complete application.
