

AviComp Controls GmbH is a medium-sized engineering company from Leipzig with further locations in Europe and Asia. Thanks to the experience gained from more than 1,500 completed projects in various industries and due to extensive certifications, the company is one of the leading providers for control and automation technology as well as in the field of digitization.

To strengthen our team and to address our diverse tasks we are seeking you as

Employee Hardware Planning (m/f/d)

The tasks include in particular:

- responsibility for basic and detail engineering
- this includes design capture, review and update of electrical design documents e.g. wiring diagrams and connection schemes
- establishing engineering drawings in 2D and lists of parts
- technical contact for our project management as well as for our suppliers and customers
- setting of items in our CAE system
- supporting our test engineers in our inhouse test center

Our requirements:

- Bachelor's degree in electrical engineering or equivalent education, preferably in the fields of process engineering, automation, mechanical engineering
- experience with CAE tools (e.g. EPLAN P8, COMOS, WSCAD)
- team spirit, diplomatic skills and self-confidence

We offer:

- an interesting area of responsibility
- an international team and strong team spirit
- wide range of training courses and a very good induction plan
- flexible working hours and home office
- height-adjustable work station
- JobTicket with a subsidy of EUR 50.00 per month or a fuel card
- company pension scheme with an AG share of 120% or 127,00 EUR
- JobRad
- corporate sports and corporate events

Interested in joining our team? We are looking forward to receiving your complete application.
